

Explanation: these matrices are designed to assist with training needs analysis within each work area. They show the general requirements only. University and local work area inductions must also be completed. Additional health and safety training may be required for specific hazards or situations. These should be identified through an assessment and risk register in the work area. Refresher training requirements (or scheduled repeats of training), should also be assessed. Repeated training for core compliance training, unless specified otherwise, is scheduled triennially (Appropriate workplace behaviours is undertaken biennially). All other refresher/repeated training is scheduled and determined by the School/Division. Repeated training scheduling may be affected by, changes to legislation, changes to work practices, industry standards and codes and employees returning from extended periods of leave. Further assistance is available from your local Health and Safety Business Partner.

For use in conjunction with [Health & Safety: Training requirements](#). For further information, refer to <http://safety.unimelb.edu.au/#training> or contact your local [Health and Safety Business Partner](#).

1. CORE COMPLIANCE TRAINING

¹ Fixed term and continuing employees are automatically enrolled into Health and Safety – Roles and responsibilities in TrainMe.

² Fixed term and continuing employees are automatically enrolled into Appropriate Workplace Behaviour in TrainMe.

³ Casual employees are automatically enrolled into Casual Compliance training in TrainMe. The supervisor may determine that Health and Safety – Roles and Responsibilities training is also required.

⁴ Labour hire workers are not automatically enrolled in TrainMe. The supervisor must make an individual assessment based on the level of supervision the staff member works under, and the hazards to which the staff member is exposed.

⁵ Hazard based training is available in TrainMe, on-line or provided by the Health & Safety team.

⁶ A visitor is a person attending a University of Melbourne-controlled workplace who requires the attention of a University of Melbourne representative to fulfill the purpose of their visit. Note this excludes visiting academics.

⁷ A contractor should have suitable safe work procedures to safely undertake the works required.

⁸ A contractor should have suitable safe work procedures to safely undertake the works required, and a suitable Health and Safety Management Plan unless the provision of services is of such duration as to make the provision of a Health & Safety Management Plan not reasonably practicable.

⁹ Accompanied means: being under the supervision of an authorised representative of the University, e.g. under the supervision of a laboratory technician, attending a tutorial or lecture, or using the library.

¹⁰ Not accompanied means: not being under the supervision of an authorised representative of the University at all times, e.g. in own office space, or in a laboratory with other students without an authorised representative of the University being present.
